

AMENDMENTS TO THE ABSTRACT

Please **AMEND** the Abstract as shown below. A clean version of the amended Abstract is provided in a separate sheet attached hereafter.

“A liquid crystal display includes the first and second substrates. The first substrate has a first insulating substrate, ~~and a~~ A pixel electrode is formed on the first insulating substrate ~~with a first opening pattern~~. The second substrate has a second insulating substrate, ~~and a~~ A common electrode is formed on the second insulating substrate ~~with a second opening pattern~~. ~~The first and the second opening patterns proceed parallel to each other while being arranged in an alternate manner.~~ The first and second protrusions having different thicknesses are formed on the common electrode. A liquid crystal material is injected between the first and the second substrates. ~~A spacer is positioned at an end of the second opening pattern to maintain the distance between the first and the second substrates.”~~

ABSTRACT

A liquid crystal display includes the first and second substrates. The first substrate has a first insulating substrate. A pixel electrode is formed on the first insulating substrate. The second substrate has a second insulating substrate. A common electrode is formed on the second insulating substrate. The first and second protrusions having different thicknesses are formed on the common electrode. A liquid crystal material is injected between the first and the second substrates.
